The Alberta Pacific Grain Company Ltd.

COMMERCIAL business in the North-West Territories in 1911—four years prior to the formation of the Province of Alberta—The Alberta Pacific Grain Company, and predecessor Companies, carries in its records a long line of service to the farmers of Alberta.

ALBERTA Grain Company, Limited, under the able management of John I. McFarland, commenced business in 1911. Total production of wheat in Western Canada in that year had reached less than 55,000,000 bushels. Under Mr. McFarland's policy of fair dealing with all farmers, the growth of his Company kept pace with increasing wheat production in the West. In 1912 Alberta Pacific Grain Company, Limited, was brought into being under guidance of Mr. McFarland, and consisted of an amalgamation of Alberta Grain Company and Alberta Pacific Elevator Company, Limited.

THE "A.P." organization continued to grow. Its elevators followed the railway construction crews into the newly cultivated areas of Alberta and extended its operations into Saskatchewan and Manitoba.

WITH the completion of the building of the Panama Canal the "A.P." became a pioneer in the movement of grain to import markets through the Western route. Terminal elevators, having a capacity of 6,510,000 bushels have been acquired by the Company at the Port of Vancouver.

THE "A.P." system has passed through the financial stress of 1907-08; the war and its aftermath; boom periods and the business upheaval of the past three years—a period of years, many of which have been obscure and filled with business uncertainty. In all but three decades of dealing with thousands of farmers and the handling of hundreds of millions of bushels of grain, the Company has never failed in an obligation to any grain grower. Among its customers today are pioneers of Alberta who drew the first bushel of grain they produced in the Province to an "A.P." elevator.

FAIR-DEALING with its customers, coupled with competent office and field staffs; efficient physical grain handling equipment and desire and ability to return to the grower the most that can be obtained for his grain, has brought the "A.P." system from its humble beginning in 1911 to its present position in the grain trade of Canada.

THE policies of the "A.P." today are and will continue to be, those of the founder of the "A.P." system.

J. I. McFarland
GENERAL MANAGER

Chautauqua Attracts Large Crowd at First Performance

Chautauqua opened its four-day engagement here, this evening when Sorrentino and his Venetian Strollers played to a full house. There will be afternoon and evening programs Thursday and Friday and a concluding program Saturday night.

The local committee announced a dance Friday night, following the evening program.

First Snowfall

The first snow fall of the season occurred last Friday. Commencing at 7:30 a.m. snow fell steadily till about 8:45 a.m. when the ground was covered to a depth of about half an inch. 8 degrees of frost was recorded during the night, but as the temperature rose the snow rapidly disappeared. The weather was cold Saturday and Sunday, 18 degrees of frost being recorded early Saturday morning.

Yesterday, the weather was unsettled, with snow flurries, sleet and rain in the morning, but cleared in the afternoon. To day the weather is warmer and sunny.

Stack threshing is being continued and a few more days should see this work completed. Very little stock threshing remains to be done.

440 Years Ago ...

Today is the anniversary of Columbus' discovery of America; at least he was the first one to get back with the story. He landed on Watling's Island in the Bahamas, October 12, 1492, as any school child knows. When he landed there he was very glad because he had been trying to make an egg stand on end all the way over and the crew thought he was a little potty, but he said, "courage men, we are as near to heaven by land as by sea," or something of the sort. Some one else said, "I think it was Sir Walter Raleigh or Guy Fawkes."

Columbus had quite a time getting started at all, but the Queen of Spain was a sprightly dame and went out and looked at the seven jewels, all except one large bunch, which was at time keeping the king's dignity intact, and bought Columbus three little ships, mere rowboats they were, but seaworthy. Well, nobody wanted to go with Columbus as they were allured to death with his egg trick so they got a lot of commercial travelers and people like that who fear nothing once aboard the smoking car, and Columbus started out. By and by he saw the lights of Manhattan, but sailed south because he feared to be eaten by savages. The crew got a little sour on Columbus, especially when the grog ran out and so he spent most of the time on deck, which made him fearfully seasick.

He finally landed on Watling's Island, and was given a real welcome by all the Watlings. Pocahontas Watling got quite a crush on Columbus, but he said, my country, right or wrong, my country—referring to the queen because no gentleman would handle a lady's name about in the presence of Watlings. By and by when all the Watlings got surly from his crew he went home and was given quite a warm time of it. America was also discovered by Ole Hansen and a headland of Minnesota.—H.D.S.

(From the Financial page, Calgary Herald.—This, no doubt accounts for the depression?—Ed.)

WEDDING

PARSONS—PHILLIPS

The wedding of Eleanor Mary Phillips, daughter of Mr. and Mrs. John Phillips of Calgary, and Rev. C. M. K. Parsons, vicar of Alsask and Oyen, was celebrated at the Pro-Cathedral Church of the Redeemer, Calgary, at 10:30 a.m., Wednesday, October 5, 1932.

VILLAGE OF OYEN

NOTICE is hereby given that, under the provisions of the Tax Recovery Act, 1925, the Village of Oyen will offer for sale, by public auction, at the Village Council Chamber, Oyen, on Monday the 31st day of October, 1932, at 2 o'clock in the afternoon, the following lands:

Lots	Block	Plan
5 and 7	1	440A AB
12 and 14	2	440A AB
5, 6 and 10	3	440A AB
10 and 11	4	440A AB
6	5	373A CD
10 and 17	6	6080A W
4, 5, 6, 7, 18	7	6080A W
1	8	6080A W
2	9	6080A W
3, 12 and 19	10	3212H H
1	11	373A CD
1	17	7035 C C

Each parcel will be offered for sale subject to a reserve bid and the reservations contained in the existing certificate of title. Terms cash.

Redemption may be effected at any time prior to sale by payment of all arrears and costs.

Dated at Oyen, Alberta, this 9th day of September, 1932.

F. C. BUSH, Secretary Treasurer.

MILLER'S Hot Specials for Cold Weather

Don't Pass this List Up!

UNDERWEAR

Men's heavy fleece combinations, Penman make, all sizes.	1.40

26 LIVES LOST IN ALBERTA BY FIRE!

This was the Toll of Human Lives in 1931.

Added to this was—

Property loss totalling more than \$3,000,000.00
Forest Fire loss totalling more than \$ 800,000.00

HELP US FIGHT THIS GREAT PUBLIC ENEMY

SOME OF THE CAUSES:

- A neglected camp fire.
- A settler's clearing fire.
- A carelessly handled burning straw stack.
- A lighted match heedlessly flung.
- An improper use of gasoline and kerosene.
- A yard or building full of rubbish.

These and many other causes result often in fires that snuff out lives and do untold property damage.

Issued by the Government of Alberta

Forest Service Branch,
Department of Lands
and Mines.

Fire Commissioner's Office,

"Fresh from the Gardens"

The Price Of Wheat.

Saskatchewan is the great wheat growing province of Canada. In normal years it produces more wheat than any state in the United States, and more than one-half of all the wheat grown in Canada, and Canada is one of the great wheat exporting countries of the world. Wheat is not only the primary industry of Saskatchewan, as it is to a somewhat lesser extent of Manitoba and Alberta; it is its very life blood upon which the existence of all other business and industry depends. It is, therefore, a vitally serious matter when the price of wheat can obtain for his wheat drops below the cost of producing it, and today yields him on these prairies only some 30 old cents a bushel. Why is this?

Dr. J. T. M. Anderson, Premier of Saskatchewan, recently stated he could see but little hope for any great improvement in the price in view of the great surplus and in view of the fact that Germany, France, Italy and even Spain were growing sufficient for their own needs. He expressed the belief that the only remedy lay in a conference of leading wheat-growing countries of the world to arrange curtailment of production.

Mr. James G. Gardiner, leader of the opposition in the Saskatchewan Legislature, in a speech delivered by him, outlined the reason why these European countries, which formerly were large importers of Canada's wheat, are now producing surplus for their own needs. He has pointed out that it is not because it is economically profitable for them to do so; quite the reverse is true. France today is devoting lands to the growing of wheat which formerly grew grapes to be made into wine, and which if still devoted to vineyards would yield larger profits. Germany is devoting large areas to wheat growing that could be and formerly were put to much more profitable purposes. The same is true of Italy, Spain, and other European countries. And the question arises: Why?

The reason is "Fear." And it is the only reason. The nations of Europe are still suspicious of each other, each convinced that others have designs upon them and only await a favorable opportunity to wage war upon them. The world could disarm tomorrow if it were not for the prevailing fear in the minds, not of statesmen but of the people of Europe. They expect another war and are preparing for it; hence they will not disarm, but are strengthening their positions in every way they can.

And when war comes, as they are convinced it will come sooner or later, the resulting war of any country will depend upon the degree to which it can feed its own people. Germany learned that great lesson in 1914-15. The people of France can live without grapes and wine, but not without bread, so former vineyards are now given over to growing wheat and other grains; in Germany century-old forests have become wheat fields and the production of less essential things have been discontinued for wheat growing. Russia is putting forth almost super-human efforts to raise enormous quantities of wheat to sell abroad in order that it may buy back machinery, electrical equipment, chemicals, minerals of all kinds, and thus create enormous industries which can, when required, be converted into munition plants. The men on the large state farms in Russia who are operating farm tractors are, at the same time, being taught the mechanism of tanks for war purposes so they will be trained ready to switch from tractor to tank in the event of war. *These things are taking place in all continental European countries.*

It is all a price exacted by "Fear" and the nations are prepared to pay the price of heavy losses sustained by the conversion of lands to wheat growing which could much more profitably be utilized for other purposes. As a result Europe no longer needs to import quantities of wheat, and the prairie provinces of Canada, whose lands are wheat fields, find the old markets upon which they relied closed to them, and themselves in the position of being unable to sell at a price which will cover the cost of production, let alone yield a profit.

The Canadian people themselves cannot escape this condition; it cannot be done by moving out Customs tariff up or down, or by inflation of currency, or by nationalization of banks, socialization of industry, writing off of debts and interest charges, because, if the prairie farmer was freed of all debt today he would begin getting into debt again tomorrow. If he went on producing wheat which he could not sell except at a price below what it had cost him to produce.

The main cause of our financial and economic difficulties in Western Canada today is the fundamental one—"Fear." If that fear could be dispelled and confidence and courage be restored to the people, the non-profitable wheat growing and go back to the production of those things which would yield them more substantial returns; they would again buy wheat instead of raising it, and would be able to pay a good price for it out of the profits derived from the production and sale of those things they can produce, and formerly did produce, to better advantage than other countries. What can Canadians do in the matter? Only this: Resist every tendency in the direction of a narrow nationalism, and encourage a broad internationalism, because extreme nationalistic feelings and ambitions on the part of one nation develop fear and a like feeling in all other nations. Every time a racial or religious prejudice is emphasized, fear is raised in the minds of some men. Whenever one nation seeks to advance its own interests at the expense of another nation, suspicions are aroused and fear grows. One reacts upon another, and suspicion, antagonisms and fear grow like mushrooms in the dark.

The world is paying an awful price because it is filled with "Fear." Let us help both nationally and in our daily individual thought and actions to dispel it.

Has Taken Long Time

A compact volume, containing all the building laws of the City of Montreal, will be issued shortly. The book, first mooted in 1890, drafted in 1910 and to see the light of day 27 years later, is said to be the first step towards a drastic town planning programme. S. Fortin, city expert, has devoted his whole time this year to compiling the manual.

Prince Of Wales Thoughtful

Royal courtesy is always apparent in the conduct of the Prince of Wales. During a hot spell, recently, when the sun was blazing on the sentry's beat at York House, the Prince, notified of this, suggested to the Officer of the Guard that, for the time being, the sentry might transfer his beat to the other side of the court, where there was some shade.

Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. C. Landy, Montreal, N.B., writes: "I am certainly recommended Dr. Fowler's Relief of Wild Distress for cramps or pains in the stomach and bowels."

"Last Summer I had such awful pains in my stomach, and lower part of my bowels, at times, I would have to sit down. I took Dr. Fowler's Relief and was soon relieved."

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

Record Hard To Equal

Newspaper Correspondent Wrote Out

Discussing newspapermen with prodigious memories, W. Orton Brown, the English writer who lives in New York and writes a column of anecdotes, says that Stephen de Blowitz, famed Paris correspondent of The London Times in the seventies, broke all records. According to the story J. T. Deane, editor of the Times, had been visiting Paris and, when de Blowitz heard the French Minister of Foreign Affairs deliver a long and important speech in the Chamber, there were no arrangements for reporting such matters in those days. Deane remarked to de Blowitz, as he was taking a train for London: "If we could have that speech from end to end in tomorrow morning's paper, what a glorious thing it would be." After his editor departed de Blowitz reasoned he could remember the speech, word for word. He wrote it out and called it, and Deane found it in the columns of the Times when he reached London. It was an accurate report.

NOT A PAIN AT 78

She Feels Like 48

Aches and pains are not inevitable in old age. When they do come, there is always a cause, and the cause can be overcome. Here is a case in point. A growing old woman of 78—

"For the last five years I have taken Kruschen Salts and I tell you truthfully I could not live without them. I am 78 years old. I have a pain in my body, and I feel as young as I did at 40. I give the credit to the Kruschen Salts. No one will believe my age" (Mrs. C. M.).

Interior Of Earth

Interests Scientists

Find Ocean Tides Disturb Crust For Six Miles Inland

Fresh evidence that scientific investigation again takes a leap for pendulum cause comes with the announcement by two men in California that they have found that ocean tides disturb the earth's crust for a distance of six miles inland. Recently scientific interest turned to the question of the earth's interior. Professor Picard, now it is directed toward the interior of the earth. Since the discovery in California was more or less accidental, being made in connection with other experiments, further observations will be required to reveal its full import. These will be made next winter.

Western Canada Flowers

Manitoba Ships Lily Bulbs To The Old Country

Frank L. Skinner, of the Hardy Plant Nurseries, Dropmore, Man., who made several shipments of lily bulbs to the Old Country and all parts of Canada has recently received a letter from W. A. Constable, Kent, England, specialist in lilies and rare bulbs that he had received favorable comments concerning his lily from various enthusiasts who saw his spike at the R.H.S. show and also from Abba Souillet, in France, who was particularly struck with the bulb. Constable is preparing these lily bulbs to be shown at the lily conference in London next year.

If Miller's Worm Powders needed the support of testimonials they could get from neither who know of the great virtue of this excellent medicine and in such a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are administered should show improvement from the first dose.

Deflects Unconfronted Coin

Attila Somlay, Hungarian actor, has invented an apparatus by which, he claims, one can easily detect counterfeit coins, even when the coin contains a liberal quantity of the more valuable metals and alloys. One such apparatus is now being tested by the Hungarian National Bank and another by the post administration.

Douglas' Egyptian Liniment is recommended for sore muscles, galls, distemper, calouses and sprains. Relieves rheumatism, flesh and hoof rot. Stops itching instantly.

About nine-tenths of the coal mined in Bulgaria is produced by the state-owned colliery at Pernik.

Task For Scotland Yard

British Police Trying To Discover Agents Of Drug Ring

Six women prominent in British society, wealthy, glamorous, and splendidly gowned, are being watched day and night by Scotland Yard as the alleged chief agents of a drug ring supplying Mafair with thousands of dollars' worth of narcotics.

So far the women have thwarted efforts of the police to get the conclusive evidence demanded by the English courts.

The six women entertain and move freely in the titled circles of London's west end. Hannan Swaffer, noted dramatic critic and London columnist, claims to have been at several Mayfair parties where a secret traffic in narcotics was taking place. "There is a drug racket which spreads from the heart of Piccadilly through the great boulevards of Paris and right across Europe into Italy," he wrote recently. Turkey is said to be the chief source of the narcotics, which are brought across the Syrian desert to the small port of El Kantara, on the Suez Canal.

Structure Of The Atom

Photograph Perplexes Noted Scientists and Uspets Theorists

A single photograph perplexes noted scientists recently and amazes them threatened to accept theories regarding the structure of the atom.

The photograph, one of 10,000 made by Dr. Carl D. Anderson, California Institute of Technology graduate, shows the tracks left in vapor by particles blasted out of the hearts of atoms of cosmic rays.

The probable interpretation of this track, scientists have viewed the photograph at a meeting of the astronomy and Physics Club stated, is that it was made by a positively charged particle, but others negatively charged particles which fly about the nucleus.

For many years, physicists have based their picture of the atom on an electron, one of the negatively charged particles which fly about the nucleus or heart of the atom, was more than 1,000 times that of an electron, one of the negatively charged particles which fly about the nucleus.

Reach Working Agreement

Saskatchewan and Alberta Co-Operate In Workmen's Compensation Payments

Coming into effect January 1 next, the provinces of Saskatchewan and Alberta have reached a working agreement covering payments under the workmen's compensation board, to employees from one province receiving injuries in the other province. A similar agreement with the province of Manitoba has been in effect for about a year.

According to the terms of the agreement with Alberta, published in the Saskatchewan Gazette, should the Saskatchewan workman, whose work taken him to Alberta receive injuries, requiring compensation, in Alberta, the Saskatchewan board pays the compensation, and vice versa.

Directions Written In Chinese

Answer To Simple Inquiry Has Regain Man Questioning

Arthur Roberts, Reginald's rat catching expert thinks the Chinese government owes him an apology. Rat catching has become a problem to him, so hearing that they had effective methods over in the Orient, he wrote the Nanking Government.

Back came an apostle addressed to the director of the health department, Regina, Kan., U.S.A.

Mr. Roberts opened it and out came yards and yards of tissue paper containing piles upon piles of Chinese hieroglyphs in long vertical rows. Mr. Roberts scratched his head and pondered it still. He did not know what it was, but he knew it was something he should use. An interpreter was trying to put him right.

Persian Halm is the one true family aid for skin health and beauty. Aids the mother in additional loveliness. Protects the tender skin of the child. Delights the father in a hair restorative or cooling shaving foam. No matter what use it is put, it is always beneficial to the skin. Every woman should use it. Persian Halm cools and carresses the skin and creates complexions of surpassing loveliness.

Brothers Widely Separated

Charles Grant of Loveland, Colorado, one of three brothers, trigly born in Scotland, recently celebrated his 92nd birthday. The other brothers, James and John, live in Australia and Hong Kong, China, respectively.

The complete opening of a rice flower has been known to take place in 30 seconds. The bloom lasts from two to three hours.

Husband (arriving home late)—"Can't you guess where I've been?" Wife—"I can; but go on with your story."

Woolen Mill For Alberta

Prospects Bright For Establishment Of One In Calgary

A recent announcement indicated that prospects are bright for the establishment of a woolen mill in Calgary. As Alberta annually produces about 3,500,000 pounds of wool, and as a fair-sized woolen mill operates at a capacity of some 500,000 pounds of wool in the grease, and a large mill from 1,000,000 pounds upwards, it is obvious that the annual wool clip in this province is keeping several large mills outside the province buy.

The woolen industry, as distinct from others, enjoys perhaps the longest economic life of all industries for the reason that it is not extraneous in the sense that other industries exhaust the sources of their raw material. Many woolen mills have been in existence a century in the same location. Hence the establishment of an up-to-date woolen mill in Calgary infers the establishment of a basic industry whose life, under proper conditions, should continue for generations. —Calgary Herald.

To End Custom Frauds

Steps Are Taken To Cope With Customs Revenue Irregularities

"The Dominion Department of National Revenue has announced a new move to end commercial frauds in connection with customs revenue," the Toronto Globe says.

"As a result of the transfer of the duties of the former customs excise pressing services to the Royal Canadian Mounted Police, a special branch for the investigation of all commercial frauds has been formed and will operate under the direction of the chief inspector of customs and excise."

"Officers engaged in this work are now located in Montreal, Toronto, Winnipeg and Vancouver," the paper says. "The Toronto staff is under the direction of G. E. M. Hunter, who has been transferred from Ottawa in charge of the work."

This Invention Is Different

Mercury Lamp Lures Mosquitoes To Death In Swarms

Catching mosquitoes by the pound has now been made possible by means of inventions perfected and put on exhibition at the 30th Concoré Lipine, at Paris, France. Testing out the contraptions, an expedition of mosquito catchers set out for the Camargue Plain, at the mouth of the Rhone River, near Marseilles. One apparatus is said to have trapped five pounds of swarms of mosquitoes within 60 minutes.

The invention consists of a mercury lamp, which attracts the biters in swarms, only to be killed, upon arrival, by a powerful insecticide, and collected in a tray.

The dove of peace, apparently, does more billing than cooing.

Dr. Hamilton's Pills

HEADACHE INDIGESTION BILIOUSNESS CONSTIPATION

STOP! HEADACHE INDIGESTION BILIOUSNESS CONSTIPATION

W. N. U. 1966

OPEN WAY FOR DISCUSSION OF IRISH SITUATION

London, Eng.—President Eamon de Valera of the Irish Free State left for Dublin after having agreed with J. H. Thomas, Dominion Secretary, to make the controversy over unpaid Irish land annuities the subject of negotiations to start October 14.

An official statement issued at the conclusion of the two-hour conference between Mr. de Valera, Mr. Thomas and several other members of the cabinet said:

"We have agreed to accept a suggestion that the question concerning Irish land annuities should be made the subject of negotiations between the two governments."

In the course of the conversations attention was called to the fact that other sums of money formerly paid to the United Kingdom were being withheld by the Irish Free State. It was agreed that negotiations should cover these sums also and that the discussions be begun in London if possible on October 14.

Meanwhile it was said the Free State will continue to keep the disputed funds in a suspense account where they were placed pending settlement of the controversy concerning them.

Ottawa Conference

Meetings held in London take divergent views on results.

Results of the Ottawa Imperial Economic Conference were described variously as satisfactory, satisfactory, Empire economic co-operation and as "propaganda" at two meetings in the United Kingdom this week.

The Central and Associated Chambers of Agriculture, meeting in London, unanimously passed a resolution welcoming the conference as bringing a "substantial advance towards a policy of Empire economic co-operation and agricultural development." At the same time, Sir Herbert Samuel, former Liberal home secretary, who resigned recently from the national government, said in a speech at Darwin the agreements were "posterior."

He asserted that when the agreements are published it will be found neither in India nor in the Dominions with the cotton trade of the United Kingdom receive any appreciable concessions.

He denounced also the proposal to impose a heavy duty on cod liver oil from Norway in order to divert part of the trade in this commodity to Newfoundland. He asked his audience how anyone should dare to propose this "enormous duty" on a medicine "essential to the life and health of a vast number of children in the poorest homes."

The agricultural chambers, however, expressed satisfaction with the agreements at Ottawa recognized the principle that agriculture in the United Kingdom should have a prior claim to the home markets.

Woman Elected President

Vancouver, B.C.—Mrs. Mary Ellen Smith is again president of the British Columbia Liberal Association. The election of the woman who has made British parliamentary history as the first woman cabinet minister, was one of the most colorful incidents of the convention just concluded. It is just 40 years since she came to British Columbia.

Wheat Price Problems

Ottawa, Ont.—Low prices for wheat constitute one of the major problems for parliament to cope with at the present session, in the opinion of Robert Gardiner, U.F.A. leader and member for Acadia, Alberta, who is now in Ottawa. The main task was to find a level on which a fair return would be given to the wheat farmer, Mr. Gardiner said.

An Unusual Celebration

Nish, Zgou-Slavia.—When Mr. and Mrs. Filipovich celebrated their 100th wedding anniversary more than 100 descendants—sons, daughters, grandchildren and great grandchildren—visited them. He is 117 and his wife 115.

Liberal For Century

Wolverhampton, England.—This first midland centre celebrating on October 4, the start of a unique century, East Wolverhampton celebrated the fact that for exactly 100 years it has sent a Liberal to the House of Commons.

W. N. U. 1933

Appoint New Secretary

J. R. McLean To Succeed Graham Spry As National Secretary Of Canadian Clubs

Ottawa, Ont.—The executive committee of the Association of Canadian Clubs has announced the appointment of J. R. McLean, formerly of Winnipeg, to the post of national secretary. Mr. McLean will take over his duties at once as successor to Graham Spry, who resigned May 1, last.

Mr. McLean graduated from the University of Manitoba in 1908, with the degree of bachelor of arts, and took his M.A. degree from the same university the following year, at which he was chosen Rhodes scholar from Manitoba. He obtained the degree of bachelor of letters from Oxford in June, 1911. He is 27 years of age and a son of Mr. and Mrs. John McLean, Yorkton, Sask.

Mrs. P. A. Wheeler, assistant secretary who has been acting secretary since Mr. Spry's resignation, will continue as assistant secretary.

Grain Shipped To Churchill

Movement Of 1932 Crop Now In Full Swing

The Pas, Man.—The movement of 1932 wheat from the prairies of western Canada to Churchill for storage during the winter, and immediate shipment overseas when navigation opens in 1933, is now in full swing, with nearly 1,000 cars already north of The Pas; the grain passing over the Hudson Bay Railway at the rate of approximately 100 cars per day.

Nine hundred and fifty cars at the north of The Pas, it was stated at the local office of the Bay line, and during the past few days has been passing through at the rate of 100 cars daily.

It is expected grain will continue to pass at a rapid rate for some time to come, and according to indications the Churchill elevator will be filled before winter sets in. The total capacity of the elevator is 2,500,000 bushels.

Alberta Oil Fields

Believe Gasoline Will Be Discovers To Stagger the Imagination

Calgary, Alberta.—In the near future enough crude oil will be produced in Alberta between Koko Lake and the international boundary to supply the British Empire, according to Arthur B. Davis, consulting geologist and petroleum engineer of the Williams Oil Company, who is in charge of oil district. Mr. Davis believes oil fields will be discovered that will stagger the imaginations of Albertans.

C. A. Roney, Los Angeles oil operator, accompanied Mr. Davis. Mr. Roney plans to drill a well at Twin River, 25 miles west of Milk River town. The drilling will take place on the property of the Nordor corporation, where Mr. Davis predicts 1,000 to 10,000 barrels daily will be produced. He placed a \$100,000,000 loan on the property.

Loan Conversion a Success

New South Wales Lites Closed Within Half An Hour

London, England.—New South Wales loan conversion, sponsored by the commonwealth along the lines of the British conversion, reducing the government's interest burden by a substantial figure, proved a remarkable success.

Cash applications were so heavy that the lists were closed within half an hour. The new loan is for five years carrying 4 per cent. interest. In the case of the Australian loan there is a 2½ per cent. bonus with a seven-day limit.

The converted loan totalled £12,360,000. Former interest rates on this sum were 5½ per cent. The nominal interest for the new issue is 3½ per cent., but allowing for the premium on repayment, the overall yield will be about four per cent. Altogether the conversion will mean a saving of nearly £500,000 a year.

Universities To Confer

Meetings Of The Heads Of Western Universities To Be Held

Edmonton, Alberta.—A call will be sent out probably this week by Dr. R. C. Wallace, president of the University of Alberta, for a meeting of the heads or other representatives of western universities, as proposed by Premier Brownlee a few weeks ago.

Replies have been received from Saskatchewan and Manitoba approving of the suggestion, and word has come from British Columbia that an answer from that province will be ready shortly.

Trade Wheat For Vegetables

Alberta Farmers Resorting To The Ancient System Of Barter

Calgary, Alberta.—Alberta farmers have turned again to the ancient system of barter to supply their wants for the winter. They are entering British Columbia by motor truck through the Crow's Nest Pass, carrying wheat which they trade for vegetables, fruit and eggs.

This method of acquiring food for the winter instead of selling their wheat at prevailing low prices was used by the farmers last year, but according to reports, the movement this season is much larger. The farmers are returning from British Columbia with their trucks loaded with winter food supplies.

One farmer claims to have disposed of a load of wheat on the basis of 60 cents to the bushel, obtaining sufficient fruit and vegetables to keep his family all winter.

Jap Population Grows

One Out Of Every Eight Births At Coast Is Japanese

Victoria, B.C.—Approximately one out of every eight births registered in British Columbia during 1931 were Japanese, according to figures released by H. W. Young, provincial health officer. Last year, registration of births of all races totalled 8,640, of which 1,342 were Japanese. Despite the fact the Chinese population in British Columbia exceeds that of the Japanese by several thousands, only 177 Chinese births were registered last year.

PROPOSAL MADE TO DISCUSS THE GERMAN POSITION

London, England.—The Exchange Telegraph Agency said the British Government was seeking to determine whether a conference could be arranged to discuss Germany's withdrawal from the disarmament conference. France, Germany and Italy were being consulted.

The agency said the matter was still under consideration, and the British Government had indicated if the conference were feasible and generally approved, it would be willing to arrange a meeting for this purpose in London.

The exact object of the conversation would be to determine whether the difficulties arising from Germany's withdrawal could be discussed in an exchange of views.

Berlin, Germany.—The British charge d'affaires verbally submitted to the foreign office an official invitation to a conference of the powers to be held in London to pave the way for Germany's return to the world disarmament conference at Geneva.

In replying to the invitation Germany emphasized that unless certain guarantees were given that the left wing for arms equality really would be fulfilled, the government of the Reich could not participate.

Without fulfillment of the German demand, the charge d'affaires was informed, the London meeting would be futile.

TO HEAD COMMISSION

Hector Chartersworth, famous Canadian journalist and editor of Saturday Night, who is said to have accepted the post of Chairman of the new Canadian Broadcasting Commission.

B.C. Coalition Opposed

Delegates At Liberal Association Meeting Refuse To Participate

Vancouver, B.C.—Demand for the holding of a general election "at the earliest possible moment" and the refusal to participate in a coalition government, as suggested by Premier S. F. Tolmie, marked the first day's action of the annual meeting of the British Columbia Liberal Association here; 500 delegates were in attendance.

The resolution declared the convention's confidence in the leadership of T. D. Pattullo and extended to him "a free mandate to choose for his associates in government men of character, ability and standing, having regard solely to the public interest."

Mr. Mary Ellen Smith was "madame chairman" at the opening of the convention. She called the delegates by their first names at times.

Used Hudson Bay Route

Miss Core Hind First Woman Passenger

Winnipeg, Man.—Miss R. Core Hind, veteran agricultural editor and the greatest woman journalist Canada has produced, sailed out of Churchill, British-bound, the first woman passenger to use the Hudson Bay route.

For the better part of her life Miss Hind has shored up in western Canada's fight for a direct outlet to world markets through Hudson Bay. When the route was finally opened to the grain trade of the world, she was eager to see for herself the Hudson Bay Railway and the northern sea passage for which she had fought so vigorously and successfully.

Concluding her ambition only to a few friends and associates, she left Winnipeg for Churchill determined if possible to get a passage. She had intended to leave earlier than she did, but only chance saved her from being a passenger on the "Bright Fan" which struck an iceberg and went to the bottom.

WEDDING OF RAMSAY MACDONALD'S DAUGHTER

Dr. Alastair Macdonald and his bride, Dr. Joan Macdonald, daughter of Premier Ramsay Macdonald, leaving the little church near Chequers after the ceremony. Every guest wore a sprig of heather, and players played the bride and groom back to the reception.

Oregon Forest Fire

Loss Is Estimated At More Than \$2,000,000

Portland, Ore.—Footing in from all sides with blasting heat, a forest fire destroyed the town of Cocharan in the Cocharan timber country, about 50 miles west of Portland in Washington county.

The loss, including that in the town, two mills, railroad equipment and timber, was estimated by those in the area at more than \$2,000,000. The town's 200 inhabitants escaped.

The community and mill camp at Edwards, nearby, burned to the ground. At Enright, three railroad tunnels, a costly rail line, several trestles and other equipment of the Southern Pacific were destroyed.

All equipment and buildings of the C. H. Wheeler Logging Company in the Cocharan area burned.

The only death reported from the most disastrous forest fire in years was that of a logger killed by a falling tree.

Other sections of western Oregon there came reports of fires, but no reports of any loss of life or property, presented a menace.

Soviet Watchword

Quality Rather Than Quantity Is To Be Guiding Principle

Moscow, Russia.—Quality rather than quantity is to be the watchword of Soviet production during 1933. So the central committee of the Communist party decided at the four-day meeting which has now ended.

The committee adopted a series of resolutions admitting serious shortcomings in the development of the country's public economy, especially in food, and exhorting the party members and the proletariat to put their shoulders to the wheel from now on.

Expel Papal Delegate

Mexico Orders His Expulsion As a Pernicious Foreigner

Mexico City.—Monseigneur Leopoldo Ruiz Flores, papal delegate to Mexico, left in a private aeroplane with two agents of the department of interior for the United States. He had been ordered expelled from the country as a "pernicious foreigner."

Monseigneur Ruiz Flores, who was at Laredo or Brownsville, the papal secretary said, never went back. It was the first time he ever had been up in an aeroplane.

ALBERTA WILL GIVE ASSISTANCE IN DEBT CASES

Edmonton, Alberta.—Government action following the decision of the Alberta Farmers' association to give assistance in debt cases will be taken shortly, it is intimated by Premier J. E. Brownlee, who says that a further announcement will probably be made when the plan has been thoroughly considered and organized.

"I am much pleased with the attitude of members of the law society," said the premier, "in offering their services on a very fair basis in an effort to work out the debtor-and-creditor difficulties. Meanwhile I can say quite definitely that any creditor firm that is showing that it appreciates the situation now existing in this province, and is willing to co-operate in solving the problem, has but little to fear."

Quoted as to a resolution reported to have been sent from the wholesalers' association in Calgary, to the effect that no further government action be taken to disturb the present credit relations, Mr. Brownlee said that no such resolution has as yet reached him.

Edmonton business interests may fight the proposed voluntary debt adjustment scheme for this province, feeling that the present system should not be disturbed.

Arrangements were being made here to call a meeting of wholesale firms in order to discuss the whole plan. In all likelihood, retail interests also will hold a meeting.

"The reaction to the scheme shows considerable opposition at present," said Secretary John Blue, of the Edmonton Chamber of Commerce.

"There is a strong feeling that as new legislation was made effective this year, modifying the Debt Adjustment act, business men are not clear as to the difference involved in between the secured and unsecured creditor."

APPOINTMENT OF NEW RADIO COMMISSION

Ottawa, Ont.—The new Canadian radio broadcasting commission will be headed by Hector Chartersworth, Toronto, editor and critic, Thomas Maher, Quebec journalist, will be vice-chairman, Lieutenant-Colonel W. A. Steel, Ottawa, director of radio research for the national research council, will be the third member of the body.

Official announcement of the personnel of the commission has been made. Appointment of the commissioners was made at a meeting of cabinet council.

The emolument of the chairman will be \$10,000 per year. Vice-chairman and Commissioner Steel will each receive an annual salary of \$5,000.

Establishment of the commission was authorized by legislation passed at the last session of parliament. The bill was based on recommendations of a special committee of the House of Commons. The commission is empowered to carry on the business of broadcasting in Canada and regulate and control broadcasting by other agencies.

Many Killed In Cloudburst

Damage Caused At Tehachapi, California, Runs Into Millions

Bakersfield, California.—The bodies of 15 victims had been recovered, five bodies were listed as dead and unconfirmed reports said 21 additional bodies had been found in a wrecked freight car in the floodwater wake of the Tehachapi cloudburst that took a toll of possibly 45 lives and caused damage estimated from \$1,500,000 to \$2,000,000.

Uninjured reports to the Southern Pacific Company here said a boxcar, swept from a bridge when the torrent wrecked two freight trains, had been found to contain the bodies of 21 men and boys.

Liquor Law Attacked

Criticism Liquor Control System In British Columbia

Vancouver, B.C.—Allegations that bootlegging determines liquor legislation in British Columbia have caused an outcry of criticism and that arrests for drunkenness have increased 100 per cent. and liquor consumption 1500 per cent. since prohibition in British Columbia, were made today at opening sessions of the annual British Columbia Prohibition Convention by Rev. J. J. MacIntyre, organizer.

Japanese Policy

Cabinet Decides Not To Alter Decision Regarding Manchuria

Tokyo, Japan.—The cabinet decided that the Leyton conference report on Manchuria to the League of Nations did not constitute cause to alter its Manchurian policy.

A cardinal point of that policy is the separation of Manchuria from China and maintenance of the independence of Manchuria, which the Japanese assisted in creating, to replace the old regime, owing allegiance to Nanking.

Alberta Bush Fires

Edmonton, Alberta.—Bush fires were reported to the provincial forestry department from the country west of Edmonton, toward the mountains, and from the Grande Prairie district, where in particular the fires were said to be quite serious. Smoke from these or other fires is already making itself felt in the city.

Employee Electrocutd

Alta, Alberta.—George B. Johnson, employee of the Calgary Power Company, was electrocuted when he came in contact with a 13,000-volt transformer as he was repairing the device on a platform 15 feet above the ground. Johnson, resident of Lacanville, Alberta, leaves a wife and family.

Suspected Frank Heid

Lillooet, B.C.—Frank Heid, game guide and trapper, wanted in connection with the murder of Albert E. Carey, game warden, near Mocha, was captured near the scene of the slaying.

Inaugurate Five-Day Week

Chico, Ont.—Adoption of the five-day week in all its plants in Canada and the United States was announced by Proctor and Gamble. It goes into effect October 14.

Burnt-Out Spots

Method Of Cultivating Bad Spots On Prairie Land

In certain sections of the prairie provinces, and more particularly in southwestern Saskatchewan and southern Alberta, the prairie surface contains many irregular but roughly circular depressions varying from three to six inches in depth and from a few feet to twenty feet or more across. These depressions are known under various names, such as "burnt-outs," "blow-outs," or "slick pots." The depressions are usually bare or support a scanty growth of vegetation, while the surrounding prairie is well covered with grass. The burnt-outs appear to be spots which from some cause or other have lost the original surface soil. The soil in a burnt-out is very fine in texture and so impervious that after water has been standing in the depressions for several days the soil below the first few inches is quite hard and dry.

Where the burnt-out spots are not extensive the land, when placed under cultivation, will produce very fair crops in favorable seasons. Breaking by the usual method has been a difficult process, as the plough tends to slide out on striking a burnt-out spot. If the work is not very well done, crops are very uneven for the first few years after breaking, those on the burnt-outs being thin and stunted. This fact suggests the necessity of having the normal prairie soil well mixed with that from the burnt-outs. It has also been observed by residents in burnt-out spots that the burnt-out spots get smaller in the course of time. This is undoubtedly due to the encroachment of the prairie soil favored by the drifting of soil into the depressions from adjoining cultivated fields. A more satisfactory preparation for this type of land has been secured by the use of powerful machinery. The breaking is done early and preferably with the ground mold. The soil is later well worked down and mixed by means of a heavy float or scrubber.

The Pas Developing As Distributing Centre

Fruit Shipment Direct From California Indicate Rapid Progress

The Pas is developing rapidly as a distributing centre for northern Manitoba, according to Paul Nattel, manager of the branch of the National Fruit Company. During the past few weeks the first direct shipments of carloads of oranges and lemons from California ever to come into the north country have been rolling into The Pas, Manitoba.

Already two carloads of oranges and lemons have been imported direct from the California Fruit Growers Association. Formerly all goods were handled from some western Canadian jobbing center, and shipped there. This development is in line with what is indicating the trend in the north country. It is a commercially significant development in the progress of The Pas as a distributing centre.

Is Really Illegal

St. Thomas Times-Journal suggests that profane language while driving may yet be declared illegal. Much of it is already illegal. The Highway Traffic Act provides that "no person shall, while on the travelled portion of a highway, solicit a ride from the driver or operator of a motor vehicle other than a public vehicle." The penalty is \$5 to \$10 for a first offence, graded up to as high as \$50 for repeated offences.

Post—"After my dear old world will realize what I have done. Editor—"Oh, well, you don't need to worry; you'll be out of danger there."

When a horse balks, the balk is in his head, not in his legs. He goes ahead whenever he decides to go ahead.

"I'd never marry a man who won't after me."
"No, but I suppose you're not arguing a man who toots with a motor horn."—Karlström, Odessa

W. N. U. 1923

THE SPECTACULAR RESCUE OF THE "FLYING FAMILY"

This picture graphically illustrates the rescue of the Hutchinson "Flying Family" by the British trawler, "Lord Talbot," after the plane "City of Richmond" had been forced down in the key waters of Greenland. Inset Mrs. Hutchinson is shown being helped aboard the rescue craft while her children at right, are safe in the arms of rescuing sailors. At the left is her husband, George Hutchinson, leader of the ill-fated expedition. Larger picture shows the plane from a barren rock near the Eskimo village of Ekker, Greenland.

Making Own Weather

Russians Find Much Can Be Done In This Respect

The Russians have decided to make their own weather. So optimistic are they about an Artificial Rain Institute, has been started at Moscow, and others are to follow. Russia is largely dependent upon the crops grown on the farms, and scientists state that presently they will be able to plan out a regular scheme of fine weather and rain occurring at just the right time. Experiments made by means of aeroplanes and powerful ground transmitting stations have shown that such can be done. In the way of bringing down rain by means of powerful high-tension currents. It has also been found possible to break up hailstorms by bombarding them with great belt-mouthed cannon firing ball charges. When the approach of a hailstorm is signalled by telephone the gunners are called to their stations and every effort is made to cause the hail to fall in districts where it will do the least damage. The vibrations set up by the belt-mouthed cannons frequently bring down the hail and prevent it from travelling to places where it might do damage.

May Complete Century

Electric Bell In Oxford Laboratory Has Been Ringing 92 Years

Ninety-two years ago, an electric bell made by a London instrument-maker started ringing in the Clarendon laboratories at Oxford. It has never stopped, and the odds are that it will complete its century of incessant ringing. So far no repairs or replacements have been needed. It is not a loud bell, for its sound is audible only a few feet away, and it is rather an extraordinary ringing contrivance. There are two ordinary bells suspended by long tubes, between which hangs a little metal ball supported by a thread. The ball taps one going and then swings away and taps the other. You might think that this is perpetual motion, but it is not, for the bell is operated by batteries in the tubes above the bells. Some day these must wear out or run down. —Tit-Bits.

Narrow-Minded Man Always Sees Faults

Unable To Appreciate Fine Qualities Of Humanity

It is usually the small-minded and narrow-minded man who can deery faults and failings with a single eye, but upon whom all the finer and grander qualities of humanity are lost. To him who ever walks with head bent and eyes on the ground the whole universe appears to be made of dust; but he who goes with head erect and eyes uplifted breathes the pure air and greets the rising sun, and forgets the dust that may be under his feet.

Turn Of Acquittal

"Your offence is a serious one," said the judge, "and if you are convicted it will mean a long term in prison. If you cannot employ a counsel the court will appoint one for you." The prisoner leaned toward the judge and in the most confidential manner whispered, "I have no lawyer, but it's all right, judge; my tailor and landlady are on the jury."

Oil has been discovered in Durus, County Cork, Irish Free State.

British Are Tea Drinkers

People Also Use Cocoa But Very Little Coffee

The British have never been a coffee drinking people. Their partiality in hot beverages is tea. Not is coffee making any progress at the breakfast table. And tea is the imports of coffee are decreasing and of tea are increasing.

The importation of coffee to the United Kingdom was 488,141 pounds, of which only 202,451 pounds were entered for home consumption. On the other hand the importation of tea in the seven months just ended was 284,630,000 pounds, and this was an increase in two years of 16,560,000 pounds. The quantity exported to all countries was 40,179,000 pounds so that the amount for home consumption was 224,451 pounds.

That works out at a little over eight pounds in the year for every man, woman and child in the United Kingdom.

As a matter of fact the British people consume more than three times the amount of cocoa than they do of coffee.

The vast bulk of the British supply of tea comes from Ceylon and India, and the coffee from Central America and British East Africa.

Feel Pinch Of Hard Times

Treasures From Japan's Buddhist Temples Are Being Pawned

Hard times do not spare anyone and Japan's 70,000 Buddhist temples are feeling the pinch. Priests have taken to cultivating temple lands to raise food for themselves and their families. Temple treasures and rich ecclesiastical robes have appeared in pawn shops and many of the smaller temples are closed. In good years, it is a prosperous temple that receives \$250 a year on contributions or rents, but as Japan's rural districts have been worst hit by the depression, this income has been almost wiped out in 50,000 of the temples.

The giant cactus begins to bear fruit when about fifty years old and is not full grown until it reaches the century mark.

Tercera is the second largest island in the Azores.

Communion Set To Be Re-Designed

Gold Service Has Not Been Used For Twenty Years

The \$10,000 gold communion set of St. Paul's Cathedral, London, England has been brought out of storage and will be melted down and re-designed. The plate was presented to St. Paul's by Ernest Terah Hooley, the financier, in the year of Queen Victoria's diamond jubilee. There are four flagons and four chalices, the total weight being 300 ounces. They were used twice and then stored. At the time Hooley is reported to have said, "I suppose they have refused to use it because they regard me as a great sinner, and they have no room for sinners in the Church of England." Canon Alexander, of St. Paul's, has just explained, "The original shapes of the vessels made the use of them in services very difficult. As a result they have been stored in the strong room of the cathedral for more than 20 years."

A Rare Accomplishment

Contrary To General Opinion Good Talkers Are Scarce

There are few accomplishments to be desired above the art of a skilled and interesting conversationalist. Judged by a multiplicity of examples the term is disconcertingly misunderstood.

So many folks seem to think that wind and words make conversation. They blather about inconsequential trifles. Their victims are given no opportunity to drop a suggestion not to express an opinion. That is one reason why so many intelligent and highly educated people talk so little.—Brandon Shaw.

Rare Plant Blooms

The Victoria Regia, one of the rarest tropical plants ever transplanted to a northern climate, bloomed a few weeks ago at the Paris Museum of Natural History for the first time in forty years. Enormous white flowers appeared among the large leaves and bloomed for several days before going to sleep again for perhaps half a century.

The sea has its "deserts" where there is little or no sign of life.

Self-Pity Is Bad Habit

Those Indulging In It More Harmed Than Helped

Never complain. Let that be your leading principle. Self-pity is one of the worst habits any one can have. Unfortunately innumerable persons have this evil habit, to their own and other people's misfortune. By pitying themselves, by continually pondering on their troubles and making a display of them in order to arouse pity in others, they increase their own sufferings without doing themselves any good whatever. Self-pity is sentimentalism of the most noxious kind and is characteristic of the weakling. Just as it is matter in the wrong place, so is sentimentalism a feeling in the wrong place.

We are equipped with feelings that we may be activated by them to leave undone that which may be necessary, such as to seek out that which will be advantageous. When we suffer pain, we should turn it to account by noting that something is going on which must be altered, and by setting to work on the instant to make the necessary change.

Instead of doing this, we surrender to pain, we are victims of true persons of feeling, but sentimentalists. There are, unfortunately, more sentimentalists than persons of true feeling and every one of them is a considerable infusion of sentimentalism. Almost all of us like indulging in self-pity, therefore, we ourselves more harm than we imagine.—E. Tietzen.

London Banks Employ University Graduates

Idea Is To Add Tone and Bring in New Clients

London banks are beginning to look to young university graduates as recruits in the banking service, the idea being to have on the bank staffs young men calculated to add to the banks and also bring in new clients. University graduates with reputations of being "good mixers" are being taken on at one of the London banks, and thereby founding a new grade of bank official.

Their prospects, it is understood, are brilliant, but success for them depends as much upon their ability to introduce new clients and to add tone to the bank as upon their actual banking capabilities. Not all of them can become Montagu Norman, but enterprise and what amounts to good salesmanship may land them one day a "glittering prize." If not the governorship of the Bank of England, the new scheme is the outcome of keen competition between the rival Big Four banks. Men of social standing and personality have long proved most worth to these banks by introducing new clients and customers; and it is hoped that the employment of more variety men will result in valuable additions to business.

The Stormy Petrel

Circles Ships In Bad Weather Searching For Food

The more popular a bird, the more local names it acquires. The brown owl is known by at least a dozen names in the various parts of the country, jeany-hew being one of the most frequently met, while its close relation, the barn owl, is often known as the churruin. To those who travel on the seas, Mother Carey's chicken, or to give the bird its right name, the stormy petrel, is well known. This small petrel is found hundreds of miles from land, and in its search for food will skim round ships in violent storms, always keeping just above the surface of the billows, and for this reason sailors will tell you it is walking on the waves. Petrels have a large quantity of oil in their bodies, and at one time the natives of the Pacific used these birds as lamps. Bodies were passed through the dead bodies, and this primitive affair gave a dim but certain light.

Seems Fair Division

Canada's production of creamery butter declined nearly 5 per cent. in July and a total of 5,000,000 pounds in seven months, compared with last year. In July, however, the Dominion wrested second place from the Netherlands in exporting cheese to the United Kingdom, and New Zealand was a close second in supplying the British market with butter. It is a fair division of Empire trade.

"A fine little man. Do you help mother?"
"Yes, I am going to count the spoon when you have had tea."

Shanghai, China, will continue its rebuilding programme.

The Sleepy Car Driver

Many Serious Accidents Have Been Result Of Fatigue

When will tourists and others on the road learn that an attempt to continue driving when the limit of physical endurance is in sight is to court disaster, possibly with very serious consequences?

Fatigued by an all-night drive, a Syracuse man recently drove his car into the side of a heavily-laden truck on one of the Western Ontario highways. He and his father were killed and his mother, the remaining occupant of the car, was seriously injured. The party was en route to Michigan where the marriage of the driver was being arranged.

This accident was one of many directly traceable to fatigue on the part of the driver, who found himself incapable of exercising sound judgment when an emergency arose. Had he not tried to do the impossible, he and his father would probably be alive today.

It cannot be emphasized too strongly that the time to stop driving is when fatigue begins to creep over the individual at the wheel. Even the most momentary nod on the part of a driver may be attended by serious consequences when the machine is travelling at high speed, and many a driver has discovered himself in a ditch, with his machine a wreck and himself injured, because he tried to continue at the wheel as the need for rest asserted itself.

For the safety of others on the road, the authorities have now had the good sense to demand of truck drivers that they should be under a certain length of duty. They recently suspended the license of one trucking concern which violated these regulations in a particularly flagrant manner.

If such a rule is required of truck and car drivers, it might also be required of the private driver who all too often keeps on driving when he is physically incapable of doing so in an approved manner. This is a disaster in which others besides his self may be involved.

Old Anchor Is Historic

Closely Linked With Discovery Of Manitoba's Report

Catalogued and numbered, an old anchor, linked with the discovery 312 years ago of Churchill, Manitoba's northern seaport, occupies a place among historical curiosities owned by the government of Manitoba.

Encrusted with brine and shaped like two great joint fish-hooks, it was almost unrecognizable by the thorough who pass it daily to view trophies of a younger generation.

Dug out of the bed of the Churchill River during harbor excavations, the anchor once held fast the good ship "Enghelmingen," one of two ships which set sail from Copenhagen, in September, 1610, with Captain Jens Munk, Danish explorer.

Munk had hoped to find the "Northwest Passage" to the Far East, linked with the discovery 312 years ago of Churchill River, and was forced to winter there. Only Munk and two others were left when the next northern summer came. Scarcy and shortage of food had taken a terrible toll. The three set sail for Norway in the smaller of the two ships. The anchor was left at Churchill.

Long Voyage Of Toy Yacht

A child's toy yacht, fifteen inches long, did a lone voyage of 129 miles in the Irish Sea. It was picked up by a Fleetwood trawler near the Gulf of Man, with the sails all set and in perfect condition. An address in Bangor, County Down, was on the sail and the ship was returned to its owner, who probably valued the toy highly.

He: "There are an awful lot of girls who don't want to get married."
She: "How do you know?"
He: "I've asked them."

South Africa has a big new road programme.

Iraq recently became a member of the League of Nations October 3, and at the same time attained sovereign independent statehood by release from its status as a mandate.

Belief that California some 50,000 years ago was the site of the North Pole was expressed by H. F. Cowden, geologist and scientist, who said his study of the state's petrified forest convinced him that in an age to come it would find itself in the tropics.

Mixed Sensations

In Parachute Jump

Leaving Plane Is Big Thrill Says Pilot Instructor

Leaving an aeroplane for a parachute jump is the big thrill according to R. J. Groom, pilot instructor at Regina's airport, who has made his first jump.

"There is a moment or two of confusion, sensations, a display of whirling earth and sky and you feel you are being shaken and adjusted."

"Then suddenly all is quiet, a quiet that seems supernatural. There is no racket. To one used to flying it is an eerie sensation to be up there with no wings, no engine, no wind rushing past and no apparent movement."

After landing Mr. Groom says one has a great feeling of confidence and affection for the parachute that aided the descent.

Medical Classes Overcrowded

Overflow classes in medicine and a 40 to 25 per cent. increase in the number of dental students marked the opening at McGill University of both these faculties. More than 700 applications were received by the faculty of medicine, which can ordinarily admit only 100 new students each year.

Older Than Royal Scots

Honorable Artillery Company Dates Back Officially To 1537

The Honorable Artillery Company, which is brigaded with the Grenadier and has a Guards adjutant and R.S.M., is a Territorial corps d'elite, though you might not have guessed it, from more outward appearances. If you had run up against them at Wipers in 1916. Though placed now only fourth on the parade order of the British Army, the H.A.C. dates back officially to Henry VIII's charter in 1537, and can quite fairly claim, through descent from London's famous trained bands, an older ancestry still. For this reason all H.A.C. bloods hold that the Royal Scots, known as Pentius Placid's bodyguard and officially the oldest regiment in the British Army, are mere babes and milk-baby sucklings compared with themselves. Pull privates pay a guinea a year for the privilege of marching with the H.A.C.

Turns To Old Profession

One Of Germany's Unemployed Is Public Story-Teller

The old profession of public story-teller, common before the spread of learning and the invention of printing, has been revived as a means of livelihood by one of Berlin's unemployed army.

Theodore Lemme, known to his customers as "Uncle Edwin," sits all day in the Hippodrome Park and tells tales of fairies and adventures to the children that gather round him. He charges from 6 to 16 cents for each story, according to length. His repertoire consists of hundreds of stories.

"It was uphill work at the start, getting a clientele," he says. "But now that the parents trust me and the children know my stories are good ones, I have more work than I can do. Often I have to go without lunch rather than disappoint the children who have waited a long time to hear their favorite tale."

BRITISH FILMS

Though there are Australian, South African and other Dominion players in British film studios, Barry Jones and Maurice Colbourne seem, with the exception of Raymond Massey, to be the nearest thing to Canadian representation. Their arrangements with producers call for time out for at least one trip to Canada each year. They are shown here with Anne Grey, during the filming of the first full length film picture, "Arms and the Man" which was largely directed by G. B. S. himself.

Vital Statistics

Saskatchewan Had Lowest Maternal Mortality In Canada In 1931

The preliminary annual report of the Dominion Bureau of Statistics for the year 1931 has now been completed and has come to hand. Commenting upon the information contained therein regarding the Province of Saskatchewan, Honourable F. D. Munro, M.D., Minister of Public Health, stated as follows:

"The outstanding feature contained in the preliminary vital statistics report just issued by the Dominion Bureau of Statistics for the year 1931, insofar as this province is concerned, is that Saskatchewan, for the first time in its history, leads all Canada in lowest maternal mortality—the rate being 4.4 per 1,000 live births, as compared with 5.0 for the whole Dominion. In view of the fact that for many years Saskatchewan had the highest mortality rate in this regard in the Dominion, and taking into consideration also the general economic situation existing throughout the province, as well as the adverse conditions in the drought areas, this achievement is significant."

"In Saskatchewan in 1931 there were 93 maternal deaths. Of this number 60 occurred in hospitals. Of the 33 deaths which took place outside of hospitals, 31 were attended by physicians, so that only 2 out of 93 cases were without medical attention."

"While infant mortality for the year 1931 shows an improvement of three points over the previous year, this province still has the fourth highest infant mortality rate. The general rate for the Dominion is 84.1 per 1,000 live births, while for Saskatchewan it is 69.0."

"The general death rate for Saskatchewan is lower than in 1930, the rate being 6.6 per 1,000 of population, which is the lowest in the history of the province since 1915. The rate for the Dominion is 10.1."

"The number of deaths from tuberculosis shows a marked decrease over 1930, the rate having decreased from 46.1 per 100,000 of population in 1930 to 36.0 in 1931. The rate for the Dominion is 74.0."

"The cancer death rate in Saskatchewan for the year 1931 is 83.9 per

100,000 of population; this is an increase over the rate of 84.0 in 1930. The rate for the Dominion is 92.0. Saskatchewan has the second lowest death rate from cancer, Alberta being the lowest, with a rate of 60.0.

"This province shows an improvement in the death rate from diseases of the heart—the rate being 71.0 in 1931, as compared with 73.8 in 1930. Ontario has the highest rate, namely, 109, while the general death rate from heart diseases for the Dominion is 132."

"The number of deaths caused by automobile accidents last year was lower in Saskatchewan than in any other province, the rate being 5.0. Ontario had the highest rate—17.4—and British Columbia took second place with a rate of 16.0."

"Of all the provinces of Canada Quebec had the greatest number of deaths, namely, 171 per 1,000 population; Saskatchewan coming second with a rate of 16.5."

"The birth rate for the province of Saskatchewan indicates a decrease of 1.3 points in 1931 over 1930, the rate for 1931 being 23.1 per 1,000 population. The birth rate for the whole Dominion is 23.2, and Saskatchewan holds fourth highest place in this regard. The three Maritime provinces show an increase in the birth rate, but in all others it is lower than in the previous year."

"It will be seen, therefore, that in the nine different sections contained in the preliminary report issued by the Dominion Bureau of Statistics, which is regarded as the barometer of public health in Canada, Saskatchewan holds premier place in five: that is to say, she has—

(a) The lowest general death rate.

(b) The lowest tuberculosis death rate.

(c) The lowest maternal mortality.

(d) The lowest death rate from diseases of the heart.

(e) The lowest death rate from automobile accidents."

"In two sections this province holds second place, namely, in the natural increase rate, and in the cancer death rate. Saskatchewan takes fourth place in the birth rate and fifth in infant mortality."

Japan's rayon trade is improving.

SUNDAY SCHOOL LESSON

OCTOBER 16

THE HOME OF THE COMING GENERATION

Golden Text: "Train up a child in the way he should go; and even when he is old he will not depart from it."—Proverbs 22:6.

Lesson: Genesis 18:17-19; Deuteronomy 6:4-9; 1 Samuel 1:24-28; Mark 10:13-16; 2 Timothy 1:3-6.

Devotional Reading: Psalm 128.

Explanations and Comments

The Training of Children In The Home. Genesis 18:17-19.—Abraham is standing on an eminence overlooking the valley that stretches to the Dead Sea. Before him are the rich and evil cities of the Plain, Sodom and Gomorrah; and it is the eve of their destruction. God is represented as soliciting and giving expression to the reason for His confidence and revealing to him His intention and showing him His justice. As the founder of a great nation it is just that Abraham should understand God's dealing with men.

"God unfolds His purpose to those who keep His commandments: obedience is the mother of insight."—Alexander Maclaren.

God had entered into close relations with Abraham in order that he should train his children, and his household so that they, too, should be obedient to all mankind. With old Jehovah, and thus Abraham through his descendants would become a blessing to all mankind.

"God's ideal nation starts with the home. The father walking in the way of the Lord to do justice and judgment, and his children and his household following after him. Home authority and home example are expected to do the most good. He will command his children and his household after him." The most dangerous sign of a nation is the neglect of home life and the growing disregard of children for parents.

The Teaching Of Children In The Home. Deuteronomy 6:4-9.—This passage the Jews call "Shema," from the first word of verse 4 in Hebrew, translated "Hear." The first and great commandment (Matthew 22:37) follows and then the duty of remembering these words and of teaching them to children is stressed. The words shall be upon one's heart, shall make so deep an impression upon one that they influence one's life; they must be taught to the children, and that the word Capetown should be joined together and not spelled Cape Town.

Recipes For This Week

(By Betty Barclay)

BROWNIES

1/2 cup special cake flour, sifted.

1/2 teaspoon baking powder.

1/2 cup butter or other shortening.

2 squares unsweetened chocolate, melted.

1 cup sugar.

2 eggs, well beaten.

1 teaspoon vanilla.

1/2 cup walnut meats, chopped.

Sift flour once-measure, add baking powder, and stir again. Add butter to chocolate and blend. Combine sugar and eggs; add chocolate mixture, beating thoroughly, then flour, vanilla and nuts. Pour into two greased pans, 8 x 8 x 2 inches, and bake in moderate oven (350 degrees Fahrenheit) 35 minutes. Cut in squares before removing from pan. Makes 90 brownies.

PEANUT-BUTTER CUTLETS

1 1/2 cup peanut-butter.

1 1/2 cup hot milk.

1 teaspoon salt.

6 half-inch slices of bread.

Pepper.

Mix peanut-butter with hot milk and seasoning, mixing together thoroughly. Dip slices of bread into the peanut-butter mixture. Sauté in hot fat. Garnish with pickles and olives.

A tennis racket a half century old is still used in tournaments in London, England. The racket, now owned by J. L. Strachan, has never been restringed.

Contains Location and Proper Spelling

A pamphlet designed to teach Americans how to spell the names of foreign cities and countries correctly has been issued by the state department.

Compiled by the United States Geographic Board, the report gives the proper spellings, location and brief additional information relating to nearly 2,500 of the more important names of foreign countries, cities, provinces, rivers and other natural features.

It states the proper way to spell Tokyo is Tokyo and not Tokio, that Yugoslavia, not Jugoslavia, is the correct English spelling of the name of that Balkan country, and that the word Capetown should be joined together and not spelled Cape Town.

Christie's PREMIUM SODA CRACKERS

Crisp, light, flaky and slightly salted. Irresistible. Once the family starts eating them... be sure the supply doesn't run out.

THE HOUSE OF DREAMS-COME-TRUE

—BY— MARGARET FIEDLER

"The House of Dreams" by Margaret Fiedler. Boston & Houghton, Ltd., London.

CHAPTER XXV.

The Test

New Year's Eve found Jean sitting alone in Claire's special sanatorium—the room which had witnessed that frightful scene when Sir Adrian had suddenly gone mad.

It was a cosy enough little room in winter-time. A cherty fire crackled in the open grate, while a heavy velvet curtain was drawn across the door that gave access to the terrace, effectually screening out the ubiquitous draught which invariably seeks entry through crack and hinge-space.

Claire was at the Dover House this evening, where a New Year's dinner-party was in progress, but Jean had no heart for festivities of any kind even had she not been precluded from taking part in them by reason of her father's death.

The grief and strain of the last four months had set their mark upon her. She was much thinner than formerly—her extreme slenderness accentuated by the clinging blue dress she was wearing—while faint purple shadows lay beneath her eyes, giving her a look of frailty and fatigue.

She and Claire led a very sober and uneventful existence at Charnwood, the one absorbed in her quiet happiness, the other in her quiet grief. But the bond of their friendship had held true throughout the differing fortunes which had fallen to the lot of each, and although for Jean there was inevitable additional pain involved in still remaining within the neighbourhood of Staple, it was counterbalanced by the comfort which drew from Claire's companionship.

Besides, as she reflected dispiritedly, where else had she to go? The Dover House would have been open to her, of course, at any time, but there she would be certain to encounter Blaise more frequently, and of late her principal preoccupation had been to avoid such meeting whenever possible. And she could not face Beinfels yet—alone! Some day, when Claire was married, she knew that she must brace herself to return there—to a house of dreams that would never come true now. But at present she shrank intolerably from the idea. She craved companionship—above all, the soothing, tender understanding which Claire, who had herself suffered, was so well able to give her.

The look that she had been reading earlier in the evening lay open on her face, and her thoughts were with Claire now. She pictured her sitting next to Nick at dinner, her flower-

like face radiant with unclouded happiness. At least her own sorrow had not yet taught her the grudging envy which could not endure another's joy.

"Blaise! . . . You!" The words issued suddenly out of her reverie as she turned again to her book. Its pages fluttered faintly, as though stirred by some passing current of air, and Jean, coming suddenly out of her reverie, was conscious of a cool draught wafting towards her from the direction of the terrace door.

Vaguely surprised, she glanced up and a startled cry broke from her lips. The door was open, the folds of the curtain had been drawn aside, and in the aperture stood Blaise Tormar.

"Jean sprang up from her chair and stood staring at him with dilated eyes, one hand gripping the edge of the chimney-piece.

"Blaise! . . . You!" The words issued suddenly out of her reverie as she turned again to her book. Its pages fluttered faintly, as though stirred by some passing current of air, and Jean, coming suddenly out of her reverie, was conscious of a cool draught wafting towards her from the direction of the terrace door.

They're forgetting Nesta—your wife. Oh, go—go quickly! You must not stay here and talk like this to me!" "No," he returned. "I won't go. Jean, I've come to take you away with me." Once more his arms went round her. "Beloved, I can't live without you any longer. I've tried—and I can't do it. Jean, you'll come? You love me enough—enough to come away with me to the ends of the earth where we'll find happiness at last!"

She sought to free herself from his clasp, pressing with straining hands against his chest. "No! No!" she cried breathlessly. "I can't go with you. . . you know I can't! Ah! Don't ask me, Blaise!" There was an agony of supplication in her voice.

"But I do ask you. And if you love me—his eyes holding hers—"you'll come, Jean."

"I do love you," she answered earnestly. "But isn't the you I love asking me this, Blaise. It's some other man—a stranger—"

"If you love me, you'll come," he reiterated doggedly. "I can't live without you, Jean. I want you—oh, hearts beloved, if you know—"

And the burning, passionate words, the pent-up love and longings of months of separation and despair, came pouring from his lips—beseeching and imploring, wringing her heart, pulling at the love within her that ached to give him the answer which he craved.

"Oh, Blaise, daughter of all—bush! flush!" she checked him brokenly, with quivering lips. "I can't go with you. It wouldn't bring us happiness. Ah, listen to me, dear!"

She came close to him and laid her hands imploringly on his arm, lifting her white, stricken face to his. "It would only spoil our love—to take it like that when we have no right to it. It would smother and smother it, make it something different. I think—I think, in the end, Blaise, it would kill me."

"Nothing would ever kill my love for you," he exclaimed passionately. "Jean, little Jean, think of what our life together might be—the glory and beauty of it—just you and I in our House of Dreams!"

She caught her breath. Oh! Why did he make it so hard for her? With every fibre of her being yearning towards him she must refuse, deny him, drive him away from her.

"No, No!" she cried tremulously. "We could never reach our House of Dreams that way—Oh, I know it! At least, not the sort of House of Dreams that would be worth anything to you or me, Blaise. It would only be a sham, a make-believe. You can't build true on a rotten foundation. . . ."

"Don't ask me any more, dear. It's so hard—so hard to keep on saying no when everything in me wants to say yes. But I must say it. And you . . . you must go back to Nesta."

Her voice almost failed her. She could feel her strength ebbing with every moment, the first of the sentimental remark that suggested itself.

"I thought—I thought you and Nesta were both dining at the Dover House," she said confusedly.

"Nesta is here. I made an excuse. I came here instead."

Something in the curt, clipped sentences sounded a note of warning in her ears.

"But you ought not to have come here," she replied quickly—defensively almost. "Why have you come, Blaise?"

"I came," he said slowly, "because I can't bear my life without you a day longer. Because—Oh, Jean! Jean! . . . Beloved! Do you need to ask me why I came?"

With a swift, irresistible movement he swept her up into his arms, holding her crushed against his breast, his mouth on hers, kissing her as a man kisses when love that has been long thwarted and denied at last bursts asunder the shackles which constrained it.

And Jean, starved for four months of the touch of the beloved arms, the pressure of the beloved lips upon her own, had yielded to him almost before she was aware of his surrender.

Then the remembrance of the woman who stood between them rushed across her and she tore herself free from his embrace, white and trembling in every limb.

"Blaise! . . . Blaise! . . . What are you thinking of? Oh! We're mad!"

She covered her face with her shaking hands but he drew them away, gazing down at her with eyes that were unshaken.

"No, beloved, we're not mad," he cried triumphantly. "We're sane—as sane as last. We were mad to think we could live apart, mad to dream we could starve love like ours. That was when we were mad! But we'll never be parted again, sweet!"

"Blaise," she whispered, staring at him with horrified dilated eyes. "You don't know what you are saying!"

You said it! it pays to "ROLL YOUR OWN" with..

Thousands of delighted smokers say it because they have proved it, time and time again. You can roll at least 50 cigarettes with a 20c. package of Turret Fine Cut cigarette tobacco. And every cigarette you roll will be to your liking. The more you roll, the more you'll enjoy them.

upon earth. I obeyed you—and I took her back. But I have done no good by it. She is as weak and worthless as she ever was.

"Our days are one continual round of bickering and quarrels," he said. "I am not satisfied! Her nominal position as my wife does not content her. Do you understand what that means—if I go back?"

He paused, his eyes bent steadily upon her. "Jean—very low—now that you know—with you still send me back to Nesta? Or will you come with me and let us find our happiness together?"

He watched the scarlet surge into her face and then retreat, leaving it a pallid white.

"Answer me!" he persisted, as she remained silent.

"Wait . . . wait a little . . ."

She muttered helplessly. "She turned away from him and, leaning her elbows on the chimney-pieces, buried her face in her hands."

The supreme test had come at last. She realized, now that her renunciation—that renunciation which had cost her so much pain and bitterness—had been, after all, only something superficial and incomplete. She had not made the full sacrifice that duty and honour demanded of her. Though she had outwardly renounced her lover—she still held him by the utter faithfulness of his love for her, Nesta had had but the husk, the shell—a husband in name only, every hour of their life together an insult to her pride and womanhood.

Thief Escapes By Trick

Pursuers Follow To Gather Hiss He Scattered

An age-old trick was used by a Toledo thief to escape his pursuers. He had snatched a bag containing \$1,500 from a truck and bolted along the street. Bystanders started in pursuit, but the thief thrust his hand into the stolen bag, pulled out a handful of bills and scattered them. Everyone drove for the money, and while they were scrambling for the money the thief got safely away.

ANCHOR-DONALDSON

Colic Pains

"I found that BABY'S OWN TABLETS relieve colic pains in infants," writes Mr. Mildred Noddin, Long Beach, N.B. Many other mothers report equally happy results from giving their children these Tablets. BABY'S OWN TABLETS are recommended by Mothers for teething trouble, upset stomach, indigestion, colic, simple fever, constipation.

There is no need and no risk in giving BABY'S OWN TABLETS to be given with absolute safety—see analysis certificate in each 25c package.

About Town and Country

Mr. F. T. Cook of the Provincial Department of Public Health gave an address in the Masonic hall, Oyen, on Monday evening, illustrated by motion pictures. His talk on matters pertaining to public health, was delivered in a very entertaining manner with a delightful vein of humor. The meeting was sponsored by Oyen Board of Trade.

On Sunday evening, Mr. Cook gave an address at the service in Oyen United Church, taking as his subject "Religion and Public Health".

Mr. and Mrs. V. E. French were Youngstown visitors Thanksgiving Day, attending a social gathering of bankers and their wives. A Thanksgiving banquet was served in the Empire hotel dining room during the afternoon, after which the managers discussed problems connected with their business, while the ladies adjourned to bridge tables at the home of Mrs. Menzies. In the evening a dance was held in the Menzies home. Guests were present from Rosetown and Kyle, Sask. Oyen, Coronation, Veteran and Sunnyside, Alta.

Mr. W. F. Pratt left last Friday for Hanna, where he will be on staff at the C.N.R. depot.

Mr. and Mrs. Andrew Anderson, of Alaska, were week-end guests at the home of Mr. and Mrs. E. E. Gillespie. Mr. and Mrs. Anderson, who recently returned to Canada after a three-months' holiday in Europe, will leave Alaska later in the month for Calgary, where they will reside this winter.

Mr. M. G. Whitlock spent Thanksgiving holiday in Saskatoon with his family.

Rt. Rev. Peter Joseph Monahan, Bishop of Calgary, will administer the Sacrament of Confirmation in Sacred Heart Church, Oyen, on Tuesday, October 18, at 10 a.m. to a class of approximately seventy candidates.

Miss Margaret Mayers spent Thanksgiving week-end at the home of her parents, Mr. and Mrs. George C. Mayers, Benton, returning to Calgary, Tuesday.

Mrs. J. Long, returned home from Calgary yesterday, after a week's visit in the city.

Mr. Fred Lockhart and Miss Dorothy Love of Saskatoon, spent the week-end in Oyen at the home of Mrs. J. Love.

Rev. E. F. Kemp, who has been confined to his home by illness during the past week, is now up again.

The joint convention of the teachers of Hanna and Oyen inspectorates, held last Thursday and Friday in the town of Hanna, was a great success and proved an inspiration to all who attended. This district of the inspectorate was very well represented by the entire staff of Oyen public and high schools, and a large number of teachers from rural schools, besides Inspector and Mrs. R. J. Scott.

An auction sale will be held at Kerr's barn, Oyen on Saturday October 22, at 2 o'clock in the afternoon, of certain chattels of the estate of the late Wm. McKenzie, also a full line of farm implements. B. H. Dial, auctioneer.

The Oyen News

Mr. F. J. Belliveau had the misfortune to be kicked by a horse last Monday evening. While his injuries were painful, it is understood that they are not serious.

Miss Rogers of Calgary was a week-end guest at the home of Mr. and Mrs. G. Caswell.

OBITUARY

JOHN FORESTER

John Forester, well known and highly esteemed farmer of Golden Centre district, passed away at his home on Sunday, October 9, 1932, at the age of 69 years. He is survived by his widow and two children, Florence and Ernest, at home and also five sisters in Scotland. The funeral was largely attended by old timers of the district. Interment took place at Oyen cemetery.

The late John Forester was born in Lushill Craig, Newburn, Fifeshire, Scotland. He came to Alberta 10 years ago and settled on the homestead where he died.
